Projects Learnt

MAIN PROJECT:

Project Name: SECURE DATA STORAGE IN DISTRIBUTED ENVIRONMENTS.

Objective of Project: Main aim of the project is to secure the data using Identity Based Secure Distributed Data Storage (IBSDDS).

Description: The file owner can decide the access permission independently. For one query receiver access one file from the owner. File owner verify the receiver details and give permission to access the file. Secure against collision attack, plain text attack and cipher text attack.

Value Adds:

- The files are stored in encrypted format and hence no one can access the plain text.
- The file owner re-encryption file to requested user, no one guess the key.
- The file owner verifies the requested users' details and give access permission therefore there is no collusion attack.
