- > Overall 3 years of IT experience with 3 years of experience in both Automation ANYWHERE RPA and UIPATH development.
- > To obtain healthy and challenging environment and acquire responsible position in an organization offering opportunities for utilizing my skill and knowledge toward the growth of the organization.
- > Working Knowledge on Robotics Process Automation Development with tools Automation Anywhere, Visual Basic&Application and UIPATH
- > Created database connections to fetch the data and automated the process to arrange data with Automation Anywhere.
- > Used String Operation to Compare and eliminate duplicates from the data.
- > Worked on using Excel and CSV commands with Automation Anywhere
- > Experience in using Send Email command to Email reports and errors.
- > Experience in reading mail and downloading Attachment
- > Experience in using Delay and Wait commands with Automation Anywhere
- > Worked on Activities using Object Cloning and Manage Web Controls.
- > Strong ability to convert business logic/requirements to automation.
- > Good knowledge of Database concept's in SQL Server&MySQL.
- > Good experience in testing web services of SOAP and Restful services using SOAPUI.
- > Worked on various quality assurance methodologies such as Waterfall and Agile Methodologies and a solid understanding of the SDLC(Software Development Life Cycle)and STLC(Software Testing Life Cycle).
- > Testing of Black-Box/Functional/GUI Testing, System Testing, Smoke Testing, Regression Testing experience on Web and Client/Server based applications by various testing tools
- > Ability to adapt to new environment quickly, strong team player, good communication&analytical skills, enthusiastic learner, confident and committed.
- > Able to demonstrate self-directed approach learning new technologies&pursue professional development

Work Experience

RPA Developer

First Source Solution PVT Limited - Bengaluru, Karnataka

July 2018 to Present

Bangalore, K.A(<https://www.fifirstsource.com/>)

- > Developed new process for employee evaluation which resulted in marked performance improvements.
- > Implemented [Programming Language]-based testing features to use on final product.
- > Involved in SDD, Case-Study Business Processes, Development, UAT, Test cases, Release Note, documentation, Process flow documentation, Production Deployment, and hand over to Production Team
- > Responsible to understand the application thoroughly for the feasible automation development.

- Gathered our customer's business requirements and clearly documented them in order to our RPA Consultant teams to deploy automation projects in an optimal manner.
- Developed the objects and workflows as per client requirement by analyzing project details thoroughly.
- Performed tool evaluation and feasibility to help in selecting Automation tool for RPA implementation.

- Exploring possibilities of automation within ImageRight, Revenue manager, CDA and AdvanceMD applications such as Finance, HR, Banking, Health care and Insurance application process.
- Worked Extensively on file, folder, and Dictionary objects.

Education

Bachelor Of Engineering in Computer Science & Engineering

Government Ujjain Engineering College - Ujjain, Madhya Pradesh

July 2013 to May 2017

Skills / IT Skills

- Technical Skills Java Script Certified from Spring People
- Web & Scripting Technology:- Visual Basic Application(Macro), Asp.NET, Webform, Web service, XML, CSS, HTML\DHMTM
- .NET Technology:- C#, ASP.NET
- Database:- SQL SERVER 2005/2008/2008R2/2012, MS Access, MySQL
- Visual Studio, Automation Anywhere 10.1/10.7/11.3/A2019, UIPATH Studio
- Protocol:-SOAP, TCP/IP, HTTP, FTP
- Other Language/Office Tools:- C, C++, MS office Professional Project
- Finance Project:- (Account Receivable & Account Payable)(2020
- 02/2021)
- Tool
- Automation Anywhere (10.7/11.3), Microsoft Office, SQL Server, SAP Application
- Logic & Language:
- VBA script(Macro), Excel Formula, Fuzzy lookup, Sql queries
- Project Summary: -
- This Project is based on Excel, SAP application and web application.Using automation anywhere command creating invoices as per the client requirement.
- After that converting in PDF and extracting particular data using a PDF and uploading the invoices or data in SAP application as per the requirement.
- Using Send Mail command, sending Input request Every day, Last working day of the month or few project Mid of the month as well.
- using Email command downloading the attachment by using specific mail subject and keeping a particular folder. Using the same file to create invoices.
- Keeping all validation as per the project requirement using macro or AA and Sending back invoices to the client asap.
- All Process we kept on Scheduler or Trigger as per the client requirement. IQ BOT(v5.0/6.0) -

- Downloading the invoices from the particular Portal and Trained Invoices using IQ bot as Per the requirement converting unstructure data in to the structure data and using the same data in uploading in particular pay to pay portal using task bot in automation anywhere using required command and validation and upload all invoices as well.
- FSL FCI (08/2019)
- 10/2019): -
- Tool:- Automation Anywhere (10.7/11.3), Microsoft Office
- Logic & Language:
- VBA script(Macro), Excel Formula
- Project Summary:-
- This Project based on the Particular Chat bot activity. Here we need to we download a chat a particular chat bot engine using automation anywhere and the chat we need to divide on parts like Customer chat, Agent chat and System chat.This is every day activity so we need to divide chat using string operations in Automation anywhere and required validation to create a particular format and update in Excel
- Involved in SDD, Case-Study Business Processes, Development, UAT, Test cases, US-Client, demo, release note documentation, Process flow, Documentation, Production Deployment and Hand over to Production Team
- Neustar(Telecom) (10/2018
- 12/2018)
- Tools:- Automation Anywhere (10.7/11.3), Microsoft Office, Neustar Application, Ch application, ESR Application
- Logic & Language:- VBA (Macro), Excel Formula
- Project Summary: -
- This Project is fully web based. we need to segregate all orders from dump. We have to process all order.Segregate the orders from dumps and Get input from input Excel file and Check the order status of PON/TN's in ESR & CH app's, based on order status get the required order details for single TN/Multiple TN's and check the responses from Gui, based on the responses received.
- Post an Acknowledgement, rejection, conformation or submission in CH and lock the order and fill the required fields for single/multiple TN's in ESR & CH app's and update the order worked details in Output Excel file
- After submitting the order of using all validation we need to create submitted order and share with client the same remote at the Eod every type of order.
- Involved in SDD, Case-Study Business Processes, Development, UAT, Test cases, US-Client demo, Release Note Documentation, Process flow documentation, Production deployment and hand over to Production Team.
- Laon Audit(12/2018 -04/2019)-
- Tools:- Automation Anywhere (10.7/11.3), Microsoft Office, Main Frame
- Logic & Language:- Excel Formula, VBA Script(Macro), Fuzzy Lookup
- Project Summary:-
- This Project is based on PDF document and Main Frame work. This project requirement to download all Loan based documents and extracting data from the documents which we have downloaded bank particular portal.
- Update all the information in Excel based checklist and this check list we need to use fill Main frame application all loan related details with all validation
- Submit the loan in particular portal after filling all details and at the last need to check loan status
- Involved in SDD, Case-Study Business Processes, Development, UAT, test cases, US-Client Demo, Release Note Documentation, Process flow Documentation, Production, deployment and Hand over to Production Team
- CMG(Creadit Report)(03/20/2021 -Present)-

- Tools:- Automation Anywhere (A2019), Microsoft Office, Desktop(Main Framework)., .Net Framework(DLL)
- Logic & Language:- Excel Formula, VB Script, DLL, CMD Script
- Project Summary:-
- This Project is based on PDF document and Main Frame work. This project requirement to download all Loan based documents using Bank website and Moved entire loan Package to Ephesoft OCR
- Ephesoft will convert the Credit report Pdf Document in Json file.
- DLL- I have created .Net dll for converting json File to csv file format.
- Taking data from csv and validating all data and updating the data in Bytepro Application after that same credit report need to inactive.
- Submit the loan in particular portal after filling all details and at the last need to check loan status
- Involved in SDD, Case-Study Business Processes, Development, UAT, test cases, US-Client Demo, Release Note Documentation, Process flow Documentation, Production, deployment and Hand over to Production Team
- Automation Anywhere
- UiPath
- JavaScript
- HTML5
- .NET

Languages

- English - Intermediate
