Last 3 month I worked in refulgenceinc Pvt Ltd company as a iOS application developer. In that company I went for interview they test my java skill at that time I performed very well then they said you are in advance level in java but we need iOS developer then they said you know java very well , in iOS swift also similar to jave (oops concept) thatwise they selected me for iOS developer.
I trained core jave in qspider Vadapalani, I know the java language from basic to advance level. Now I am searching a job for developing a knowledge in java programming field instead of salary. I want to get a more experience and advance knowledge in the java programming.

Willing to relocate to: Chennai, Tamil Nadu - Hyderabad, Telangana - Bengaluru, Karnataka
