Aspiring to get a challenging position in an organization where I could demonstrate my skills, abilities and implement new ideas in tune with quality and creative talents and commitment to excellence for the betterment of the organization and desire a position with career growth potential.

Work Experience

Java Developer
IT company

Education

BE in CSE
Anna University

2019

HSC
State Board

2015

SSLC
State Board

2013

Skills / IT Skills

- Programming Languages: Java

  Web Technologies: J2ee (Servlet, JSP) Database: Oracle (SQL)
  Operating Systems: Windows

  PROJECT
  Title:
  Dynamic Opportunistic Routing and Multipath Scheduling Scheme with Robust Transmission in Wireless Networks
  Description:
  Bandwidth reservation has been increasingly used inhigh-performance networks to provide Quality of Service (QoS) for various applications ranging from real-time multimedia communication in early years to big data transfer more recently.Routing and Multipath plays an important role in the network. Routing and multipath Scheduling scheme by scheduling the request and routing packet from source to destination.The scheme that maximizesend-to-end connectivity in the network and minimizes faults at link or/and node level. The amount of Data transfer must be high with the shortest path and time complexity must be very low.we propose scheme for scheduling and Delivery of packet from source to sink .A set of multiple paths are established from the source to multicast destinations using energy efficient neighbour node selection mechanism. It provides effective load balancing at the node and finds a stable path between the source and destination meeting the delay requirement usingmobile ad hoc networks.

Certifications and Licenses
